

Welcome

NUS FinTech Summit 2026

Welcome to the NUS FinTech Summit 2026! We are thrilled to have you join us for this exciting hackathon.

Please look through this participant handbook for all the crucial information regarding schedules, workshops, submission guidelines, and the problem statements/bounties.

PLEASE NOTE THAT ALL TIMINGS RELATED TO THIS HACKATHON IS IN **SGT (GMT +8)**

Key Information

[Telegram Channel Link](#)

[Devpost Link](#)

Amenities provided

- Wifi
- Charging port
- Food (refer to schedule for more details)

Key Dates

The summit takes place from **5–9 January**:

Date	Activity	Format
5–6 January	Online Workshops	Virtual
7 January	Hackathon Opening Day	Physical
8 January	Virtual Hacking Day	Virtual
9 January	Physical Demo Day	Physical

Hackathon Format Overview

The hackathon format is structured to provide a focused yet flexible challenge:

Step 1: Tackle the Main Challenge (Ripple) 🚨

Required for all teams. Qualifies you for the Main Grand Prizes

Step 2: Add Bounties (Optional)

Stack these on top of your main project for extra cash. (Projects must still satisfy the main challenge)

- Ripple Feedback Bounty
- BGA Bounty

Schedules

Day 1 – 7 Jan | Opening Day

Join us:

On-site	COM3 MPH, COM3 Building, 11 Research Link, Singapore 119391
---------	---

Time	Event
11:00	Registration & Networking
11:30	Opening Ceremony
12:00	Lunch
12:00	Hackathon Kick-off

Notes:

- Bring your laptop and any materials you need for hacking.
- The Ripple Team will be present on-site from 11am - 6pm

Day 2 – 8 Jan | Opening Day

There will be no physical or Zoom sessions on Day 2.

Notes:

- Continue hacking with your team at your own time and location
- Please ensure your project is completed and ready for **final submission on Day 3**.

 Day 3 – 9 Jan | Demonstration Day

Join us:

On-site	COM3 MPH, COM3 Building, 11 Research Link, Singapore 119391
---------	---

Time	Event
08:30	Registration & Breakfast
09:00	Final submission deadline
10:00	BGA Bounty Live Pitch (until 2 pm)
10:30	Opening speech
11:00	Panel Discussion
11:45	Career booth networking + Lunch
12:30	Finalist teams notified
13:00	Finalist Presentations (5 min pitch + 2 min Q&A each)

Time	Event
15:30	Prize Presentation + Closing ceremony

Notes:

- BGA bounty live pitch will pause during panel discussion.
- Finalists: Check Telegram for presentation order and details.
- All participants: Network responsibly at the Career Booth.

Workshops

Online Workshops (5–6 Jan)

Refer to the Workshops tab in the NUS Summit 2026 channel for full details.

Links to all workshops:

Metacamp Online Workshop:

<https://nus-sg.zoom.us/j/83747166000?pwd=ObKCo2TkQGSy0Jddhnh3ZyFdachJ4o.1>

Meeting ID: 837 4716 6000

Passcode: 863582

GSR Online Workshop:

<https://nus-sg.zoom.us/j/83630378645?pwd=GqFdQNljwoQXNWHglPb13ybzVCeeCb.1>

Meeting ID: 836 3037 8645

Passcode: 710203

Animoca Online Workshop:

<https://nus-sg.zoom.us/j/89015113920?pwd=G9XMzpyf0WohQJRIEeEqmYAxlrXaft.1>

Meeting ID: 890 1511 3920

Passcode: 305031

Ripple Online Workshop:

<https://ripple.zoom.us/j/96378186762?pwd=StV5cAfmq0EjjDBvaSeiAngKU2fKA3.1>

Meeting ID: 963 7818 6762

Passcode: 875325

 Register once for all workshops via this [form](#)

Date	Time	Workshop	Topic	Speaker(s)
5 January (Monday)	4:00 – 5:00 PM	Metacamp Online Workshop	Build Everything Onchain: Migrating Web2 Apps to Fully Onchain Systems	Jonas Chen (Co-Founder)
6 January (Tuesday)	10:00 – 11:00 AM	GSR Online Workshop	Stablecoins & DeFi	Aravind Srinivasan (Head of Systematic OTC Trading) Ray Pan (Senior Software Engineer)

Date	Time	Workshop	Topic	Speaker(s)
6 January (Tuesday)	12:00 – 12:30 PM	Animoca Online Workshop	Intro to RWA & Tokenization	Caleb Lim (Associate Director)
6 January (Tuesday)	5:00 – 6:00 PM	Ripple Online Workshop (Highly recommended)	XRPL, Developer Tools & Hackathon Resources	Maxime Dienger (Dev Advocate) Emma Nasser (University Blockchain Research PM)

Note: As the problem statement will be XRPL-centered, the Ripple workshop is **HIGHLY RECOMMENDED**.

Submission Guidelines

Submission Requirements

Here are the requirements for submitting your hackathon project:

Requirement	Details
Deadline	Jan 9, 2026 9:00 AM (SGT). *Late submissions will strictly not be entertained.
Platform	Submissions must be made on the Devpost platform: https://nus-fintech-summit-2026.devpost.com/

Deliverables Checklist

The following items must be included in your submission on the Devpost platform:

- **Public GitHub Repository Link (compulsory)**
 - Should be open and public
 - Ensure the repository contains all your code.
- **A Maximum 3-Minute Video (compulsory):**
 - Provide a link (YouTube or Google Drive) to your video.
 - **Ensure access controls are toggled so that judges can view it.**
 - The video must include a **project demo** (this is important).
 - Presentation slides are optional in the video (less important)
- **Responsive Telegram Contact (compulsory)**
- **Tell us what XRPL features have you made use of and how did you use it? (compulsory)**
- **Contract Address(es) (recommended)**
 - List all contract addresses and specify where they were deployed to.
- **Deployed website link (Optional)**
- **Presentation Deck (Optional)**
 - This hackathon places less importance on the presentation deck and more importance on a successful project demo.
- **Bounty Tracks (Optional)**
 - Please indicate all the bounty that you wish to sign up for and make sure the requirements are met.

If you would like to participate in the Ripple Developer Feedback Bounty, please fill up this [form](#)

Ripple Problem Statement

Ripple Problem Statement

3 winning projects will be awarded a prize:

Placement	Prize (SGD)
1st Place	5,000
2nd Place	3,000
3rd Place	1,000

Overview

Build a Minimum Viable Product (MVP) that leverages the XRP Ledger's (XRPL) core features to solve a real-world problem. We are seeking innovative solutions with a variety of use-cases.

Areas of Interest

If you don't know where to start, we are especially interested in applications around:

- Payments
- Real-World Asset (RWA) tokenization
- RLUSD integration
- Decentralized identity (DID)

Successful Project Criteria

A successful project will solve a real-world financial problem using XRPL. Features could include:

- DID-integrated fintech identity flows
- RLUSD-based apps
- SDKs for other developers to easily integrate XRPL features like RLUSD, escrows, and DIDs into their app
- Payment apps, microfinance, and Real-World Asset (RWA) Tokenization

Submission Requirement (IMPORTANT)

To compete, you must submit a working, testable MVP that is publicly available on GitHub with a detailed README. In the [README.md](#), show us how you used XRPL features in your projects.

Rubrics

- Business Potential - **20%**
- Creativity of Solution - **20%**
- Use of XRPL - **30%**
- Completeness of Solution - **30%**
 - we would like to award teams who build out their project more fully

Resources

Documentation and other resources are available [here](#) to help you get started.

Ripple Bounty

Ripple Bounty: Feedback Challenge

Ripple is offering a bounty for the best feedback related to the developer experience during the hackathon.

Bounty Details

The goal of this bounty is to gather valuable insights to improve the XRPL developer journey.

Award: 1-2 bounties of 500 SGD each.

Description: The award will be given for the most thorough feedback about challenges or bugs encountered throughout the developer experience while building on the XRP Ledger (XRPL).

Submission

To participate in the Ripple Bounty, please fill up this [form](#)

BGA Bounty

BGA Bounty: Problem Statement

Projects that align with the [UN's 17 Sustainable Development Goals \(SDGs\)](#) will qualify for the BGA Track in this hackathon.

Our track seeks innovative blockchain-based solutions addressing critical global challenges and real-world problems. The scope is not limited to the examples below, but the following are representative categories of projects that meet the requirements.

Prize

There is a **2,000 USDT pool prize**. There could be 5–8 winning teams for this prize pool, and the winning teams will split the pool.

Areas of Interest

1. Security and Transparency

Goal: Enhance the transparency, traceability, and security of operations using blockchain.

- **Transparency:** Immutable records on a blockchain prevent data tampering and fraud.
- **Traceability:** Enable end-to-end tracking of goods or services to ensure authenticity and reliability.
- **Security:** Decentralized encryption protects against hacking and ensures secure data storage.

2. Life and Health

Goal: Promote healthy living and equitable healthcare using blockchain.

- **Medical Records:** Securely manage medical data while maintaining privacy and enhancing efficiency.
- **Pharmaceutical Traceability:** Prevent counterfeit drugs by tracking their journey from production to usage.
- **Health Data Sharing:** Enable seamless, secure data exchange between medical institutions.

3. Sustainable Development

Goal: Address environmental challenges, promote clean energy, and achieve economic sustainability.

- **Clean Energy Platforms:** Develop decentralized trading systems for renewable energy.
- **Carbon Tracking:** Record emissions data on-chain to enable effective reduction measures.
- **Sustainable Supply Chains:** Ensure resource optimization and transparency in supply chain management.

4. Global Education Development

Goal: Advance equitable access to quality education for all.

- **Credential Verification:** Use blockchain to store and authenticate academic certificates.
- **Decentralized Educational Resources:** Promote equitable distribution of learning materials.
- **Online Learning Platforms:** Secure and transparent digital education systems for global accessibility.

5. Reducing Inequality

Goal: Tackle resource disparities and promote inclusivity.

- **Financial Inclusion:** Provide access to decentralized financial services for the underserved.
- **Social Welfare:** Ensure transparent and efficient welfare fund distribution via blockchain.
- **Digital Identity:** Offer blockchain-based IDs for equitable access to social services.

Judging Process

To be considered for the BGA Bounty, come to the BGA booth on demo day to pitch your ideas and projects to the judge live.

- Each presentation should be no longer than 2.5 minutes.
- There may be questions posed by the judge after your pitch.
- Virtual presentations will be permitted on a case-by-case basis. Participants should let us know at least one day prior.

Rubrics

social impact - 30%

technical implementation - 20%

innovation - 20%

sustainability & scalability - 20%

presentation - 10%

Finalist Presentation

- Live Demo (recommended), if not recorded video works too!
- Presentation slides (recommended)

We are interested to see how you showcase your project's creativity, business impact and innovative use of XRPL features.

FAQ

Frequently Asked Questions (FAQ)

This section provides answers to common questions about the NUS FinTech Summit 2026 Hackathon.

Physical Attendance

Must hackathon participants come for opening day?

Highly encouraged, especially if you indicated it in the registration form. You can meet the Ripple team and get direct feedback and your questions answered. There will be a free buffet-style lunch. Come to mingle around with other hackers and enjoy the good vibes together.

Must hackathon participants come for demo day?

Yes. There will be a panel discussion by industry leaders, a buffet-style lunch, and physical pitching for every team who opts for the BGA bounty. Come and see and hear about the finalists' project ideas during the live presentation.

- If you would like to participate in the BGA bounty, you will only be considered if you pitch live at the venue.
- For participants who would like to pitch virtually, you will have to let the organizers know on 8 January, and it would be subjected to approval on a case-by-case basis.
- If you are selected as a finalist, you must be present unless you are an overseas participant.

Hackathon Related

Does everyone need to create a Devpost account?

No, only one person has to create the account and make the submission on behalf of the team.

Can I start working on the idea before the hackathon starts on 7 Jan?

Ideation and doing research is ok and encouraged. Writing code before the start of the hackathon will not be allowed. The first commit to initialise the repository should happen after the hackathon starts at 12pm.
